ABOUT

My name is Alexandr and I am a Full Stack web developer with more than 5 years of experience.
I love my job. I am hungry for new skills and technologies. I like to work on interesting projects and meet interesting people. Workaholic and perfectionist.

I have a lot of experience with *PHP* (mostly *Yii2*), as well as client *JS*. Recently, I have discovered *Vue2 (Nuxt SSR)* for frontend and a *microservice architecture* pattern with *queues* through RESTful. For databases, I use both *PostgreSQL* (primarily) and *MySQL*. I am also experienced with *Swift* as *iOS* (available on App Store) and *macOS* apps.

I fully understand how the modern web works and how to make web applications not only fast but also efficient. I love UNIX-based systems and have extensive experience with *Debian* and *MacOS*. In friends with SOLID, DRY, KISS principles.

...everything that can be automated should be automated.
